

Provider consistency ranks are not stably ordered

Within-pair-consistency provider rank by substrate (1 = most consistent; cell sub-value = consistency)

Kendall's $W = 0.31$ against the exact null ($p = 0.18$) — underpowered at five substrates, uninformative about concordance.

v0.19 headphones	1 0.91	2 0.85	3 0.66
v0.20 skincare	1.5 0.94	1.5 0.94	3 0.90
v0.21 cosmetics	2 0.85	1 0.90	3 0.81
v0.22 automotive	2 0.94	3 0.93	1 0.97
v0.23 spirits	1 0.91	2 0.90	3 0.89
	Anthropic	OpenAI	Google

P3 NOT SUPPORTED — no provider is reliably steadiest; rankings reshuffle and five categories cannot resolve them.
