

The Beyond-Presence gate is informative in only one substrate

Raw vs Presence-residualized CV-CPC stability. $\rho(\text{dCV-CPC}, \text{dC_P})$ is null wherever C_P is constant.

Hatched/muted = recognition-saturated (v0.20-v0.23); residual = raw. v0.19 is the lone informative substrate.

H_CPC_Drift_Beyond_Presence: MARGINAL — residual $\rho \geq 0.50$ in 1/5 informative substrates (4/5 saturation-flagged)
