

CV-CPC rank order holds from t1 to t2 in four of five substrates

Per-brand CV-CPC at t1 vs t2; identity diagonal dashed. Defined both waves (mean recall ≥ 1.0).

Indigo = passes 0.70 criterion; warm = miss (v0.19, $\rho=0.42$, n.s., n=8).

P1 SUPPORTED — recall-consistency standings held in four of five categories; the miss is the smallest, most fragmented panel.
