

# Presence is stable where measurable; saturated to a constant in two substrates

Per-brand C\_P (0-6) at t1 vs t2; 0.80 criterion. Degenerate panels shown honestly (no fabricated rho).

v0.21 & v0.23: C\_P at the 6/6 recognition ceiling both waves — rank-degenerate; exact-match supplement instead.

P3 SUPPORTED WHERE MEASURABLE — recognition standings held wherever there was a ranking to hold; two categories were a constant ceiling, both waves.
