

CV-CPC rank order holds from t1 to t2 in four of five substrates

Per-brand CV-CPC at t1 vs t2; identity diagonal dashed. Defined both waves (mean recall ≥ 1.0).

Indigo = passes 0.70 criterion; warm = miss (v0.19, $\rho=0.42$, n.s., $n=8$).

H_CPC_Temporal_Stability: CONFIRMED — $\rho \geq 0.70$ in 4/5 substrates (MC permutation, 10k draws)
