

Presence is stable where measurable; saturated to a constant in two substrates

Per-brand C_P (0-6) at t1 vs t2; 0.80 criterion. Degenerate panels shown honestly (no fabricated rho).

v0.21 & v0.23: C_P at the 6/6 recognition ceiling both waves — rank-degenerate; exact-match supplement instead.

H_Presence_Temporal_Stability: MARGINAL — 3/5 measurable (all rho ≥ 0.80); 2/5 rank-degenerate at ceiling
