

The Beyond-Presence gate is informative in only one substrate

Raw vs Presence-residualized CV-CPC stability. $\rho(\text{dCV-CPC}, \text{dC_P})$ is null wherever C_P is constant.

Hatched/muted = recognition-saturated (v0.20-v0.23); residual = raw. v0.19 is the lone informative substrate.

P2 NOT ESTABLISHED — the independence test could only run where recognition varies; four of five categories sat at the recognition ceiling.
