

Panel attrition by tradition cell — pre-Phase-A versus post-Phase-B

Worldwide n dropped from 16 to 10 across two attrition stages, breaching the C1 adequacy floor of 12 by a deficit of 2. The European cell remained intact; the American cell lost two long-tail brands; the Japanese cell collapsed entirely (Vermicular at Phase A; Iwachu, Sori Yanagi, Noda Horo at Phase B). This pattern produces the FALSIFIED-on-panel-inadequacy verdict for
