

Provider consistency ranks are not stably ordered

Within-pair-consistency provider rank by substrate (1 = most consistent; cell sub-value = consistency)

Kendall's W = 0.31 against the exact null ($p = 0.18$) — underpowered at five substrates, uninformative about concordance.

H_Provider_Ordinal UNINFORMATIVE — Kendall's W = 0.31, exact $p = 0.18$; underpowered at $N = 5$, not disconfirming.
