

Presence quality's ranking follows recall's; Share of Voice's doesn't

Rank–rank plots: AIAS recall-SOM rank vs. HubSpot dimension rank (n = 24)

Dashed line = perfect rank agreement. Presence quality hugs it; Share of Voice scatters — its variation is real but rank-misaligned with recall.

The convergence gap is rank-alignment, not spread: Share of Voice varies as much, but its order does not match recall's.
